SCORECARD SCREEN

GENERAL AREAS OF THE SCORECARD SCREEN

- SCORECARD:** The Scorecard displays point-by-point information about every point of match, as well as the running score of the match.
- FILTERS:** Select any combination of attribute filters to highlight (in the Scorecard) all those points that have the corresponding attributes.
- APPLY FILTER Button:** Click this button to activate the selected Filters.
- CLEAR FILTER Button:** Click this button to clear/reset all previously selected Filters.
- PRINT CHART Button:** Click this button to print the Scorecard.
- WATCH POINTS Button:** Click this button to view video clips* of all those points that have the point-ender attributes corresponding to selected Filters.

**The video feature is only available if video file has been imported for this particular match.*

						2	0											

SCORECARD (Partial)

Reading the Scorecard:

The Scorecard displays point-by-point information about every point of match, including the point number, the game and set score, the server, (first or second) serve, notes, and point-deciding shot attributes (+/-, effect, stroke, target, tactic).

The abbreviations (e.g., “DF”, “X”, “U”, “F”, etc.) displayed in the Scorecard refer to standard *7 Shot Tennis* match charting notation. (For more information about match charting abbreviations, [click here](https://www.7shottennis.com/7st-match-charting-app-chart-symbols/) or enter the following URL into your browser <https://www.7shottennis.com/7st-match-charting-app-chart-symbols/>.)

All points in which “Player 1” hit the point-deciding shot are displayed beneath the name of “Player 1” on the left (green) side of the scorecard; and all point in which “Player 2” hit the point-deciding shot are displayed on the right (blue) side of the scorecard. **All points in which the point-deciding shot were unforced errors are shown in red font.**

The server for a given point is indicated by an entry in the S1/S2 column on that player’s side of the Scorecard. An “S1” entry indicates that the first service was in; and an “S2” entry indicates that the first service was a fault.

Filtering the Scorecard:

The screenshot shows the 7 Shot Tennis scorecard interface. At the top, there are player names and scores. Below that, there are filter menus for 'Player', 'Serve', 'Tactical Pos.', 'Effect', and 'Stroke'. A red arrow labeled '1a' points to the 'Player' filter menu, '1b' to the 'Effect' filter menu, and '1c' to the 'Tactical Pos.' filter menu. A red arrow labeled '2' points to the 'Apply Filter' button. Below the filter menus, there is a scorecard table with columns for 'Serve', 'Effect', 'Stroke', 'Tactical Pos.', 'Tag (F)', 'Tag (B)', 'Length', and 'Notes'. The table shows four rows of data, with the second and third rows highlighted in blue. A red arrow labeled '3' points to the highlighted rows.

Filters can be used (individually or in combination with other filters) to highlight all those points for which the point-ending shots have the attributes corresponding to the selected filters.

By way of example, suppose we want to find all the points in the above illustrated match where Pete Sampras (1a) hit a Winner (1b) point-ending shot from the Attacking (1c) tactical position:

Simply (1) select the desired point-ender attributes from the filter drop-down menus, then (2) click the “Apply Filter” button. All points corresponding to the selected filters will be highlighted (3) in the Scorecard.

To reset all filters, simply click the “Clear Filter” button.

Viewing video clips of the filtered points

You can view video clips* of each of the points for which the point-ending shots have the attributes corresponding to the selected/applied filters by clicking the “Watch Points” button.

The left screenshot shows the 7 Shot Tennis scorecard interface with the 'Watch Points' button highlighted by a red arrow. The right screenshot shows the video screen displaying a tennis match clip on a clay court.

Clicking the “Watch Points” button takes you directly to the Video Screen, where the same filters will be applied and video clips of each of the corresponding points will be displayed.

**The video feature is only available if video file has been imported for this particular match.*

Editing the Scorecard

Occasionally the User (that's you) may want to add, delete or change one or more attributes that are displayed for a particular point in the Scorecard. This is easily accomplished by clicking *any* cell in the Scorecard for the point.

Stroke							Shot					Detail			
#	Server	Effect	Stroke	Target	Tac.Pos.		Server	Effect	Stroke	Target	Tac.Pos.	Tag(1)	Tag(2)	Length	Notes
28	+	W	B	3	D	15	0	S1							
29	+	W	F	3	C	30	0	S2							
30	+	W	F	20pt	N def ac	40	0	S2							

This opens the attribute details editing window for that point.

Point details for point 29

Point Order: Stroke (F1)

Ending Type: --

Point Server: F2

Point Serve: S2

Point Effect: Stroke (W)

Point Stroke: Forehand (F)

Point Target: 4

Target Modifier: All pt

Point Tactics: Conclude (C)

Tactic Defensive Modifier: --

Tactic Direction Modifier: --

Tactic Side Modifier: --

Rally Length: --

Point Tag (1): --

Point Tag (Alt): --

Point Notes: Client's string broke during pt

Close Update Point

After making any change(s) to the point details, click the “Update Point” button.

(In the example shown, the Point Target has been changed from target area 3 (see point 29 in scorecard above) to target area 4 and the “Ad” side Target Modifier has been added. Also, a note has been added to indicate that the racket string broke during this point.)

When the “Update Point” button is clicked, the App returns to the Scorecard screen, and the Scorecard is updated with any changes.

Stroke							Shot					Detail			
#	Server	Effect	Stroke	Target	Tac.Pos.		Server	Effect	Stroke	Target	Tac.Pos.	Tag(1)	Tag(2)	Length	Notes
28	+	W	B	3	D	15	0	S1							
29	+	W	F	4a	C	30	0	S2							Client's string broke during point
30	+	W	F	20pt	N def ac	40	0	S2
